Hibernate – Many-to-Many Example (Annotation)

Posted on April 27, 2011 ,   Last modified : April 28, 2011
By mkyong

In this tutorial, it will reuse the entire infrastructure of the previous "Hibernate many to many example – XML mapping" tutorial, enhance it to support Hibernare / JPA annotation.

> **Note**
> For many to many with extra columns in join table, please refer to this tutorial.
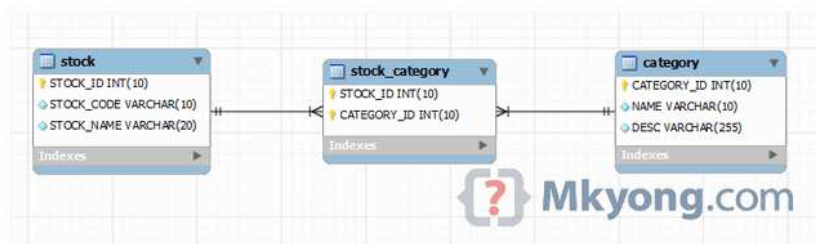

Project Structure

Review the new project structure of this tutorial.

1. "Many-to-many" table relationship

See the previous many to many table relationship again.

2. Hibernate Model Class
